Size Medium - 9 + 16 50# cubic ft. A full weight, high density fertilizer.

Uses This product is designed for use where the need for potash is high or where turfgrass feeding is done with specialized Nitrogen products. The best time to use is in the late Fall or early Spring at the ½ pound Nitrogen level. This supplies 1½ pounds of Potash per 1,000 sq. ft.

Coverage Basis 1/3 pound Nitrogen—one pound Potash per 1,000 sq. ft. - one application.

| 4.17# | 175# | 11.43 Acres | 12,000 Sq. Ft. | 4 Tons |

- Features**
1. A high potash ratio designed for use where soil potash levels are low. Ideal for late fall application where a high potash grade is needed to help improve winter hardiness or spring applications where sandy soil textures won't hold potash.
 2. Excellent for use with turfgrass feeding programs that include specialized nitrogen products.
 3. All potash is from sulfate of potash to reduce high chlorine levels.
 4. Iron added to help produce a greener thicker turf.
 5. Contains sulfur to help balance the nitrogen program for a dark green turf.
 6. A complete fertilizer designed to grow good turf while building potash levels and not affecting soil phosphorus levels.
 7. An ideal product to use in low potash situations to help create balanced feeding and not luxury feeding as usually occurs with heavy potash applications.

- Features**
1. A homogeneous granular turf fertilizer containing 5.5 units WIN (50% Organic Nitrogen).
 2. A premium product formulated to give fast green-up and sustained feeding. An imbalance of nutrients usually favors disease development.
 3. Granules sized for fairway use for fast and effective spreading with either spinner or drop type spreaders.
 4. 100% sulfate of potash - provides increased summer durability both from the stand-point of traffic and disease resistance and increases winter hardiness.
 5. Formulated with magnesium to help prevent deficiencies on acid sandy soils and to balance the potash required for good rich turf.
 6. Rich in sulfur to help develop dark green turf, increasingly important under higher fertilization rates, sandy soils and less sulfur from the atmosphere. Sulfur balances the nitrogen program to insure dark green growth.
 7. Iron added to enhance green color on high alkaline soils, especially on irrigated turf areas.
 8. Enriched with manganese to insure an adequate soil supply even at high pH levels and accentuated by cool wet conditions. At the ideal 2:1 iron to manganese ratio.

Size Small -12 + 16 65# cubic ft. A full weight, high density fertilizer.

Uses This product is designed for greens, tees and fairways where potash is low or where turfgrass feeding is done with specialized Nitrogen products. The best time to use is in the late Fall or early Spring at the ½ pound Nitrogen level. This supplies 1½ pounds of Potash per 1,000 sq. ft. Apply 3 to 4 lbs. of product per application year round.

Coverage Basis ½ pound Nitrogen - one pound Potash per 1,000 sq. ft. - one application

- Features**
1. A high potash ratio designed for use on greens and tees when soil potash levels are low. Ideal for late fall application where a high potash grade is needed to help improve winter hardiness or spring applications where sandy soil textures won't hold potash.
 2. Excellent for use with turfgrass feeding programs that include specialized nitrogen products.
 3. All of the potash is from sulphate of potash to reduce high chlorine levels.
 4. Iron added to help produce a greener thicker turf.
 5. Contains sulfur to help balance the nitrogen program for a dark green turf.
 6. A complete fertilizer designed to grow good turf while building potash levels and not affecting soil phosphorus levels.
 7. An ideal product to use in low potash situations to help create balanced feeding and not luxury feeding as usually occurs with heavy potash applications.
 8. Ideal for year round applications where low nitrogen and higher sulfate of potash is desired all in one product with W.I.N. On tees, greens and fine turf apply at 3 to 4 lbs. per 1,000 sq. ft. every 3 to 4 weeks.

Size Small - 12 + 16 50# cubic ft. A full weight, high density fertilizer.

Uses This product is designed primarily for use on greens, tees and other areas where a high quality turf is desired. Suggested rates ½ - 1 pound Nitrogen per 1,000 sq. ft. during warm seasons and 1 - 2 pounds Nitrogen during cool seasons.

Coverage Basis one pound Nitrogen per 1,000 sq. ft. - one application.

| 5.6# | 245# | 8.2 Acres | 9,000 Sq. Ft. | .37 Tons | 5.51 Tons |

- Features**
1. A homogeneous granular non-burning type fertilizer - 90% Organic Nitrogen, 10.0 units WIN. A balanced ratio for sustained feeding. An imbalance of nutrients usually favors disease development.
 2. Specially sized for use on greens and tees for rapid penetration into the root and less pick-up by the greens mowers.
 3. Excellent to use where phosphorus is high from repeated applications.
 4. Sulfate of potash provides increased summer durability both from the traffic and disease resistance standpoint and increased winter hardiness.
 5. An acid formulation to help hold down pH buildup in greens and tees.
 6. Contains magnesium to help prevent deficiencies on sandy acid soils and to balance the potash required for good, rich turf.
 7. High in sulfur to help produce a dark green turf-increasingly important with high fertilization rates, sandy soils and less sulfur pollution in the atmosphere.
 8. Sulfur balances the nitrogen program to insure luxurious green turf, especially important where clippings are removed.
 9. Iron added to enhance rich green color on high lime areas. Especially beneficial on greens made from coarse sand and acid peat.
 10. Contains manganese to insure an adequate soil supply even at high organic matter and pH levels - accentuated by cool wet conditions. Formulated at ideal 2:1 iron to manganese ratio.

Pursuant to notices given, the undersigned offers bid(s) to City of Fort Wayne (Governmental Unit) in accordance with the following attachment(s) which specify the class or item number or description, quantity, unit, unit price and total amount.

The contract will be awarded by classes or items, in accordance with specifications. Any changes or alterations in the items specified will render such bid void as to that class or item. Bidder promises that he has not offered nor received a less price than the price stated in his bid for the materials included in said bid. Bidder further agrees that he will not withdraw his bid from the office in which it is filed. A certified check or bond shall be filed with each bid if required, and liability for breach shall be enforceable upon the contract, the bond or certified check or both as the case may be.
